DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 2, 6, 7, 10-13, and 22-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kade et al. in view of Bodie et al.

Re claims 1, 2, 6, 7, 10-13, and 22-42, Kade et al. discloses a vehicle braking apparatus comprising: a hydraulic braking apparatus including a first hydraulic braking device (18, 20) configured and arranged to apply a first hydraulic braking force on at least one first wheel subject to a first braking system; a second braking system (34, 36) that is different from the first braking system; and a regenerative braking apparatus including a first regenerative braking device (65) configured and arranged to apply a first regenerative braking force on one of the first and second wheels that is linked to a non-driving shaft and that is subject to a corresponding one of the first and second braking systems and an internal combustion engine (Column 2, lines 9-14) configured and arranged to drive on of the first and second wheels that is lined to the driving shaft. However, Kade et al. do not teach wherein the second braking system is an electric braking apparatus different from the first braking system. Bodie et al. teach an electric braking apparatus including a first electrical braking device configured and arranged to apply a first electric braking force on at least one wheel subject to a second braking

Application/Control Number: 10/659,381

Art Unit: 3683

system that is different fro the first braking system. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided an electric braking apparatus in the system of Kade et al. to provide additional control of the braking system while in operation.

Response to Arguments

3. Applicant's arguments with respect to claims 1, 2, 6, 7, 10-13, 22 and 23 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Huls et al. teach vehicle brake systems comprising hydraulic braking, and regenerative braking.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3683

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (703)305-0293. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on (703)308-3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
